The project involves the following construction activities

Construction of two ski pistes in Phase 1 in the length of 2,200 m, and another three pistes in Phase 2, each 800 m long. The vertical transport of skiers will be provided with two 4-seater cable cars and two ski lifts, and the development of the artificial snow system has been planned with a water retention area and night skiing lights. A hotel with 40 rooms and 80 beds is planned to be built at the foot of the ski slope along with 10 bungalows, restaurants, service facilities and other facilities.

Realization model

Open negotiating options.
